Application/Control Number: 10/785,231

Art Unit: 1724

This application contains claims directed to the following patentably distinct species:

Claims 1-3, 5, 6, 8-18 directed to the species shown in FIG. 4;

Claim 4 directed to the species having the flow path shown in FIG. 4 and the connector arrangement shown in FIG. 11;

Claim 7 directed to a species not shown in any of the drawings (the species of FIG. 4 is not disclosed to have an end cap with an untreated water supply inlet conduit); Claims 19-23 directed to the species shown in FIG. 7.

The species are independent or distinct because they are mutually exclusive of one another, for example, the species of FIG. 4 includes three valves whereas the species of FIG. 7 includes only one valve, and the connector between the main body and end cap incorporated by the species shown in FIGS. 4 and 7 includes a threaded connection whereas the species of FIG. 11 includes a bolted connection.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Application/Control Number: 10/785,231

Art Unit: 1724

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Application/Control Number: 10/785,231

Art Unit: 1724

unpatentable over the prior art, the evidence or admission may be used in a rejection

under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Matthew O. Savage whose telephone number is (571)

272-1146. The examiner can normally be reached on Monday-Friday, 7:00am-3:30pm.

M. Savoy.
